### NOVELTY (N) & INVENTIVE STEP (IS) Claims 1-11

The invention defined by the claims is a paint roller cleaner which comprises a housing being a close fit around a paint roller, the cleaner also including an opening whereby excess paint from is collected in a first cleaning action, the cleaner also including a locking means to lock the paint roller in place whereby cleaning fluid under pressure is applied to the paint roller in a second cleaning action.

None of the criations listed above individually disclose the invention defined in Claims 1-11.

However when cutation (iii) is combined with cutation (ii) as would be obvious to a person skilled in the art, would disclose all the features of the claims 1-11

See for examples the figures of citation (ii) and figures 1 and 2 of citation (iii).

In addition when citation (iii) is combined with citation (i) as would be obvious to a person skilled in the art, would disclose all of the features of the claims 1-11

See for example figures 1 and 2 of cutation (ii) and paragraph 3 lines 63-68 of cutation (i).

VIII. Certain observations on the international application	
The following observations on the clarity of the claims, description, and drawings in on the question whether the claims are fully supported by the description, are made:	
Claim 9 is not clear because it seems "scrapper" on line 2 should be scraper.
